

Get all the answers!

Use this discussion guide to keep track of the questions you want to ask your child's doctor. You can write in the answers you receive and take notes for future visits.

What is my child's height percentile for this visit and from the last visit?

Do my child's measurements indicate a problem? (ie is my child's percentile the same, increasing, or decreasing?)

What is my child's annual growth rate (annualized growth velocity)?

What is my child's mid-parental height? Is my child on track to reach that number?

Does my child need to see a specialist?

If I'm referred to a specialist, how should I involve your office in my child's ongoing care?

What are my next steps?

Specialist Referral Information

Physician Name: _____

Phone Number: _____
